- ◆ Remote MatriVideo™ DVR system configuration
- ◆ Video display in 1x1, 2x2, 3x3 and 4x4 screen layouts
- ◆ Instant playback for security prompt response
- ◆ Instant snapshot of video image to JPEG file
- ◆ Digital signature with watermark protection

The enterprise video surveillance management console in a portable platform

MatriVideo™ Command Center Lite is designed for the users who do not require the full operation features with triple monitors of Command Center, or for those who do not have enough desk space to hold triple monitors. And most of all, it is designed for the remote users who are away from Command Center, either traveling on the road, maintaining the system off hours, or simply viewing the view occasionally.

Command Center Lite can display real-time live video in 30 frames per second per camera, playback recorded video, view alarm instances and control PTZ cameras remotely. Through its user-friendly graphical user interface, even none security professional users can operate the video with comfort and ease.

Instant Playback function provides security professionals an easy tool to review the movement just happened by simply click the button on display panel. The Advanced Smart Search function provides the latest technology of intelligent video analytics on recorded video, including advanced motion detection, intrusion detection, object left/ removal detection, crowd density management, and scene change detection.

Command Center Lite provides the most convenient and comprehensive video search and playback tool. It illustrates the video recording period over the history, along with reminding indicators for alarm instances (from video loss, motion detection, sensor or digital input, etc...), and manual recording instances (special events triggered by security guard while viewing the live video).

Command Center Lite can be installed at remote offices, the executive's home, or laptop computers. Through the TCP/IP connection (LAN/WAN/xDSL), it is a cost effective way to keep in the loop with all other MatriVideo™ DVR and video recorders.

Command Center Lite is a software package. Users need to supply their own hardware PC and monitor. The recommended hardware specification is listed in the following table.

Hardware Requirement

MV-CC2001-S
