The remote video surveillance software - Simple, Easy, and Intuitive

MatriVideo™ Command Center One (CCOne) is a free software designed for single NVR management, bundled with MatriPak solution or MatriVideo 2C NVR. This solution is ideal for multi-site market segments: Quick Service Restaurants (QSR), Convenience Stores, Schools, Residential Housing and many more. With Command Center One, regional managers can have the easiest way to control and manage their field with daily operation.

Command Center One provides the functionality to view live video & perform playback, system configuration setup, and alarm management. Through its user-friendly graphical user interface, even the non-technical users can operate the application software with comfort and ease.

Command Center One can display real-time live video in 30 frames per second per camera, playback recorded video, view alarm instances and control PTZ cameras remotely. Instant Playback function provides security professionals an easy tool to review the movement just happened by simply click the button on display panel. The Advanced Smart Search function provides the latest technology of intelligent video analytics on recorded video, including advanced motion detection, intrusion detection, object left/ removal detection, crowd density management, and scene change detection.

CCOne-Simple, Easy and Intuitive.

Command Center One is a software package, which can easily be installed on an on-site computer, remote office desktop, or an executive laptop, with a simple TCP/IP connection.

Users need to supply their own hardware PC and monitor. The recommended hardware specification is listed in the following table.
