Istanbul, Turkey

October 8-11, 2009 : #L808-915
@ Taipei, Taiwan

Website:

www.instekdigital.com

Thank you for visiting our **Booth#: 2762** at the Anaheim Convention Center in Anaheim, CA. ASIS was another successful show for us. **Instek Digital** in partnership with **Order-Matic**, introduced an innovative and unique product offering:

Video is quickly becoming the new benchmark for POS integration. POS tying comprehensive search functionality with an advanced video management solution enables business owners and managers to increase productivity and increase efficiency. Daily operational questions, such as **“What time did my manager open the store today?”**, **“Did we have too many employees today?”**, **Why was this transaction cancelled?”**, **“What is this employee doing differently to generate more revenue?”** can now be effortlessly answered.

Sharing our booth with our esteemed partner (Order-Matic) not only provided our customers with an opportunity to benefit from an end to end solution, but also yielded numerous benefits for us as a company. Hopefully by now, you're *“caught up”* on your backlog of paperwork and we can take this opportunity to discuss implementation of your ideas. Instek Digital and Order-Matic are uniquely positioned to provide the resources to help analyze and resolve the security challenges that you currently face, and to give you the upper hand.

We welcome you to visit our website at: <http://www.instekdigital.com> to learn more about our company and its defining innovative solutions in POS Integration, Digital Video Technology and Video Analytics. We also encourage you to review our full page ad in the **Modern Security Magazine**.

We will be contacting you over the next few days to discuss the opportunities on hand in further detail. You can also reach us at your convenience, at:
