Command Center Lite

MatriVideo™ Command Center is a high performance enterprise real-time video management system. Integrated with the latest video intelligence software, the MatriVideo™ Command Center offers the most comprehensive video search tools available in the market today. This innovation will keep you on the cutting-edge of technology.

MatriVideo™ Command Center Dual is a video management system designed to work with dual monitors to manage an enterprise video surveillance system. With two display monitors the operator has a comprehensive view of the areas under surveillance as well as control of the devices within the associated views. This dual monitor application will save desk space while giving your system the powerful tools needed to monitor an enterprise system.

MatriVideo™ Command Center Lite software was designed with remote users in mind. If you're traveling on the road, maintaining the system off hours, or simply watching video feeds occasionally, stay in command with this portable technology. No matter where you are, your security solution is in reach.
